Team Name Definition: A team name is a name used by one or more license holders sponsored by or associated with the same broker that is not the broker's name or an assumed business name of the broker. Team names must end with the terms *team* or *group*. Team names cannot contain terms that imply that the team is offering brokerage services independent of the broker. Some prohibited terms are *brokerage*, *company*, and *associates*. The terms *realty* or *real estate* are acceptable as part of a team name as long as the team name ends with the terms *team* or *group*. Keep in mind that the ad must still contain the name of the broker. Before you use a team name in an ad, the broker must register the team name with TREC.
